News of Mine, of Prospect, of Furnace and of Mill.

BINGHAM CON. AND LEAD BLAST

Its Largest Individual Shareholder Says the Project Is Indefinitely Hung Up.

The proposition looking to the addition of lead-blasts to the Bingham Con.'s battery of copper furnaces in the valley has been indefinitely pigeonholed, said Hon. P. L. Kimberly, who revels over the possession of a larger block of shares than does any individual holder in that prosperous organization, on his reappearance at the local offices yesterday morning; and, while he does not announce it, the market is left to infer that arrangements for the reduction of lead ores controlled by his company and himself have been effected. Meanwhile the output of ores of this class from the Bingham company's Dalton & Lark group is going to the furnaces of the American, as is also that of the Honerine mine and mill, although it is denied that con-tracts have been signed up.

With the behavior of his interests in this State, as well as those in Idaho, Mr. Kimberly returns very much pleased. The increased flow of water from the drain tunnel on the Honerine of Stockton and the unwatering of the great volumes of wealth in that came great volumes of wealth in that camp from which the miners have long been excluded is a source of much gratification to him, while the output of con-centrates from the new mill and the production of high-grade lead ores from production of high-grade lead ores from the mines encourages the belief that dividends will make their appearance the present year. With conditions at the Annie Laurie of Kimberly, in which the gold-bearing ledge has just been tapped through the No. 5 tunnel, he is equally well pleased, all reports from there testifying to a most sensational increase in its glittering assets, while regular dividends tell the balance of the story. His inventory of interests in this State completed, Mr. Kimberly will go to Idaho, to inquire into the progress of work on the Twin Falls Power and Land company's undertaking, which promises so much for the ing, which promises so much for the material interests of the neighboring Commonwealth.

Discussing the presence of galena in the waters now gushing from Honerine ground at Stockton, Walter G. Filer, who detected its presence, says it is nothing less than evidence of a ledge to which a cross-cut will be extended as soon as the waters in the tunnel re-cede. Meanwhile the waters in the main workings of the bonanza are receding eight inches daily, a condition more gratifying to the management than any discovery of ore it has made.

BAD ROADS AND BULLION OUTPUT

The week's settlements in the ore and bullion market were reduced to \$355,200, this compared with \$436,500 for the previous one. The shrinkage was entirely in the settlements on ores, with Bingham and Alta the keenest sufferers, the product of the latter shut out entirely. while those of Bingham that were re-liant on the wagon wheel for transportation were compelled to store the output and resign themselves to conditions. From the copper furnaces the managements continued to forward the output of copper bullion containing gold and silver, the crop for the week reaching 738,791 pounds, that was dis-tributed as follows:

Utah Con.		302,00
Total pounds		
In the copper matte sen American smelter was con	t out	by the
170,000 pounds of the red r	netal.	Lucia

The day's settlements in the open market amounted to \$53,290, McCornick & Co reporting them as they follow. American builion, \$35,100; gold buillion, \$9200; gold, silver, lead and copper ores, \$18,900.

In the metal market silver ruled at 55% cents an ounce, lead at \$3.50 per hundred pounds, and casting copper at & cents a pound.

CALDWELL IS RAISING HIGH-GRADE ORE

A letter from Isaac Hazelgrove, who is now superintending properties out of Sodaville, Nev., says that Alex Caldwell, leasing the property of the Utah-Tonopah company, is taking out good ore and that company, is taking out good ore and that the forwarding of it will begin in a short time. The properties are located thirty miles south of Candelaria and twenty-two miles from the new station on the "Tonopah route" to which he will haul the product. The discovery was made by a field man sent out by the company, whose headquarters are in this city, about a year ago, and local interests are congratulating themselves that a good thing has been required. year ago, and local interests are con-gratulating themselves that a good thing has been acquired.

PARTED WITH HOLDINGS IN THE SHEBA COMPANY

Judge John W. Burton, having parted with his interest in the properties of the Sheba Gold and Silver Mining company in Humboldt county, Nevada, and retired from its board of directors, now proposes to devote his attention exclusively to the development of the Ploche-Nevada company's mines, the first consignment of ore from the latter to arrive the present week. Just what sum was required to dislodge his interest in the Sheba the Judge would not divulge, but it is said to have been a substantial one. The vacancy on the board occasioned by his retirement will be supplied, it is said, by Judge O. W. Powers.

LOST PACKER TO HAVE A PERMANENT OUTLET

A wagon road between Loon creek and Custer City, Ida., over which the ores of the Lost Packer mines shall find an easier outlet is now positively as-

sured and an engineer by whom the survey is to be made to begin his work as soon as the weather shall permit him to get into the field. The construction of the road will be under the immediate supervision of the Lost Packer company, which promises a most active production, although it will have the co-operation of mining and other interests in the region generally. ests in the region generally.

THE WEEK'S RECORD ON LOCAL EXCHANGE

The week on the mining exchange losed on the sale of 67,145 shares of stock for \$80,473.50, the day with the transfer of 1855 shares, that brought \$57.8.78. The close was a featureless one and in harmony with the discordant conditions inherited from tempestuous March. Daly west, with another unloading threatened at the slightest exhibition of strength, made no attempt to rally and closed on offerings around \$25.60, while Daly was a rejected bargain at \$2.65, with Ontario held at \$5. Builion-Beck, that reached the market during the week with a dozen carloads of ore, was an offering at \$1.50, or on a basis of \$150,000 for the whole, while Con, Mercur was marked down to \$5 cents, or to a basis of \$55,000 for its plant and properties. Century was traded in around \$0 cents, at which figure its shareholders are drawing down over \$30 per cent per annum, while the best to be had for Sacramento, which opened the month with a dividend of \$500, was held at \$22. Daly-Juoge, with its shares apparently empty, closed to a bid of \$4.25, and while Horn Silver passed round a quarterly dividend of \$20,000, with the physical condition of the properties exceeding that of any period in many years, the best to be had for it was \$1, with Mammoth an offering at \$1.00, although some of its ores are showing as much as \$20 per cent copper. Grand Central declined to poke its face from the door at less than \$5, or Silver King at less than \$55, while Montana of Tonopah was in good demand at \$1.50, with Lower Mammoth recording a single transfer at \$5 cents. Tetro was yet unsteady, as was Star Con, and New York, the day closing on the following market:

Boston Copper Market

Special to The Tribune.

BOSTON, Mass. April 2—Copper shares were generally quiet and somewhat heavy during the early part of the session, but a spirited demand sprang up in a few issues in the last half-hour, prices showing a decided improvement. This market is improving daily, a good foundation being now in evidence. Traders are more ready to take hold of anything that shows a little life, while commission houses also show more inclination to enter the market. The closing was active and strong.

WASHINGTON-Willard, Raleigh,

Mr. Wallace, who investigated the basin ninety days ago, has no doubt of results that will be achieved by the Union company and to demon-strate them the officials will have, be-fore the adjournment of the meeting on Monday, placed orders for equipment. President Ravenscroft, who will visit the field again tomorrow with J. H. Bigger, the local representative of the company, will remain some days or un-til boring is inaugurated.

NICK TRELOAR QUITS THE UNITED COPPER

Nick Treloar, who six years ago shook the carbonates of Tintic from his jumper to join the Heluze forces at Butte, has resigned his position as foreman of the Rarus mine and is now on his way to California, Mrs. Treloar and son to go to her former home at Galena, Ill., to await the coming of her husband. When asked why he had retired from his position as foreman of the Rarus, Mr. Treloar is quoted by the Standard of Anaconda as saying: "I am dissatisfied. There are some

things about the company I have been connected with that I do not approve of and, not approving of certain mat-ters and methods, I thought it advis-able that I should sever my connection with the corporation employing me. I am going to be away for a short time to take a much-needed rest. Butte is my home, however, and I will return in about one month."

THE FEDERAL COURT AND MAJESTIC COMPANY

As the only resident representative of the Majestic Mining & Smelting company service was yesterday had in the proceedings in bankruptcy instituted in the Federal court upon Mint M. Mays, who has been acting as manager custodian of the properties. When he left camp R. R. Tanner, the receiver for Utah, was in possession of the mines and smelter, nor will he be disturbed until returns upon the process are made on April 9th to Judge Mar-shall. Receiver Tanner has retained all of those who have been in the em-ploy of the company pending the ad-justment of its troubles and matters at camp will continue as they have since the smelter was blown out.

Discussing conditions in the south Mr. Mays says that much activity is visible around the Newhouse Cactus mines and that final surveys for the branch line of railway between 'Frisco and the terminus at Newhouse have soon been completed

WOULD NOT ACCEPT RECEIVERS' CERTIFICATES

The Milford Times, discussing the effect Settlement of claims.

The failure of the company to pay its debts has caused great distress to the miners, merchants and others in this section, and there appears to be no immediate relief in sight.

Attorney Cherrington stated that, so far as he knew, the plaintiff had no definite plans for financing the company or pay-ing off the indebtedness, but declared that these proceedings would not stand in the way of any practicable plan of

In the way of any practicable plan of Settlement

Last evening the receivers met with Attorneys George B. Greenwood and W. F. Knox, who represent local claims aggregating nearly \$50,000, nearly all of which are secured by first liens. The receivers submitted a proposition to pay off all of these claims with receivers certificates, running for one year and bearing interest at the rate of 5 per cent, these certificates to constitute a first lien on the property. The plan was rejected by the attorneys, who were unable to see that it offered any relief to their clients, as they now hold first liens at 8 per cent.

GALENA'S DIRECTORS CALL FOR MORE MONEY

At a meeting of the directors of the Galena Mining company during the week an assessment of 2 cents a share, or \$2000 with which to discharge the urgent indebtedness of the company, was called for, the levy to become delinquent May 7th. While nothing official has been released, it is the belief that the company will resume active work the present year, as certainly expert talent familiar with conditions at Fish Springs, the home of the property, cannot be induced to believe other than that the property will be made to repeat, if it does not exceed, the record of earlier days, during which it distributed dividends amounting to distributed dividends amounting

FIELD OF COPPER

Initial Lot of Concentrates From the Utah-Plant Will Be Early Enlarged.

With which to move the first lot of copper, gold and silver-bearing concentrates from the Utah Copper company's battery of tables in Bingham canyon to the furnaces of the American Smelting and Refining company, was yesterday required five cars on the Rio Grande route, and while the management has not consented to release any data upon the metallic contents of the product it is characterized as up to expectations. President Charles M. MacNeill and colleagues, who were at the local offices of the company after forty-eight hours at the plant and properties, said of the former that mechanically it was irreproachable, metallurgically perfect, while at the latter all work continues to plough its way through somer gold and ellipses. way through copper, gold and silver-bearing masses. Already, he added, have results achieved in the experi-mental mill been verified, and as rapid-ly as transportation shall permit the plant will be made to reduce 1000 tons daily. Indeed results thus for head daily. Indeed results thus far have demonstrated everything upon which the company relied, and as expeditiously as means shall allow will the company equip itself for the reduction of 6000 tons or more a day. Equally as fervid in his assurances was Spencer Penrose, treasurer of the company, while Prof. Richard Penrose said that he could, without hesitation, sanction all that had been said by his colleagues. Manager Jackling and Superintendent Janney, who were in town during the day, will leave for camp again this morning, and on Monday the members of the household will gather for the purpose of discussing enlargements.

TAKES AN OPTION ON NEVADA GROUP

Upon a group of gold-bearing proper-ties recently located by W. R. Smith out of Sodaville, Nev., an option was yesterday executed in favor of H. H. Mayne of this city, the latter to inaugurate active development at once. Mayne, who completed his examination of the group and returned to town on of the group and returned to town on Friday, was not a little astonished at results disclosed in the furnaces, these showing as much as 32.2 per cent copper and 12 ounces silver, with \$9 gold per ton, while the quartz taken from another puncture revealed as much as \$20.67 gold, with 10 ounces silver. There were other samplings which told of the presence of copper, gold and silver, and the intention of gold and silver, and the intention of Mr. Mayne is to inaugurate active deelopment as soon as camp can be established. The group, which consists of four locations, is about a mile north of the Contact Copper group, which is now being opened up by Mr. Smith with most encouraging results.

BINGHAM PROSPECTS TO BE CONSOLIDATED

A deal is in progress by which the Hazel claims, 1 and 2,, adjoining the Montezuma mine on the north, and the Star claim-next north-are to be consolidated and operated by a company, says the Bingham Bulletin - The Hazels are owned by W. J. Strickley and partners and the Star by Ben Butof the receivership on the affairs of the Majestic company, says it is impossible a fine tunnel site for the group. It has to say whether it will hasten or delay the settlement of claims.

The failure of the company to pay its ground will have between 350 and 400 feet vertical depth on the Montezuma

> This movement is important, as surface indications tell of a good ore body under Montezuma ridge. The Hazels under Montezuma ridge. The Hazels have their discovery in Markham and extend into Freeman guich, where all operations will be conducted from the Star tunnel site.

The same publication says that at The same publication says that at over 600 feet depth the middle tunnel of the Erie recently cut the Butler-Liberal bedded vein, for which it was driving, and a raise is now being made on ore twelve to fifteen inches wide and carries lead, a good grade of iron and some red oxide of copper. The streak is increasing, and vein matter indicates that a fine ore body is near.

Cairns & Rooklidge, the leasers, are also working in ore in the lower tunnel, though it is not of as good grade. They are putting out about two carloads daily, and next week will have a good shipment ready for hauling to depot.

MAIN CARISA SHAFT WILL SINK AGAIN

The main shaft on the properties of the Carisa Mining company at Tintic is to be dropped 200 feet deeper, or to a depth of 900 feet, said Manager Joseph during the day, the work to begin as soon as a contract can be awarded. Conditions on the upper levels all justify it, said the manager, after a careful study of the ground during the week, and the work will be pushed as rapidly as possible. Mr. Joseph reports some of the lessees now raising ore that shows as much as 50 per cent copper, while the lot will maintain a most sensational average.

Thursday's transfers on the San Francisco mining exchanges were recorded as they follow: MacNatmara, 50 at 22c; Mon-tana-Tonopah, 400 at \$1.375; 2400 at \$1.40; 200 at \$1.475; Midway, 1600 at 28c; Belmont, 200 at 50c, 1000 at 22c, buyers sixty and ninety days; Tonopah & Great Western, 1000 at 5c.

The Beacon to Ship.

The Beacon to Ship.

John Leyshon, Abe Fotheringham, Garrett Reynolds and the other owners of the Beacon property have decided to resume work on the property, and within a few days they will be shipping ore. The upper tunnel went through twenty-two feet of fine copper suiphide ore, for which the Salt Lake smelters offer Sis per ton on the cars at Milford, and the owners believe they can ship 1000 tons or so of this ore without trouble. In other workings there is a large body of iron ore that carries \$13 in gold, and this can be shipped at a good profit. There is also some lead ore of a good shipping grade, and there is no doubt but the property

can be operated at a fine profit, says the

Metal Markets.

NEW YORK, April 2.—There were few buyers in the metal market today. Holders were firm in their views and prices were nominally unchanged, excepting coper which was quoted at \$13251.25 electrolytic, \$12.57\(\delta\) \$12.50\(\delta\) \$23.50. Excepting, \$12.52\(\delta\) \$12.50\(\delta\) \$23.50\(\delta\) \$25. Lead—\$4.00\(\delta\) \$65. Iron—Steady and nominally unchanged.

Mining Notes.

The annual meeting of Century share-olders is scheduled for tomorrow. A. L. Monson, manager of the sampler at Reno, Nev., is in town again. Messra Snyder and MacVichie are ex-pected from the East tomorrow.

Postmaster John Stilwell was down rom Alta yesterday, the trip having been nade on snowsboes. The management of the Boston Con. of

Bingham is again moving its ores to the Bingham Con, furnaces. Managing Director Holden of the United States company is expected back from California tomorrow.

Directors Dickson and Wood of the Daily West are scheduled to return from California the present week. J. C. Gladden, who is again developing interests out of Tonopah, Nev., came in from the West yesterday morning. The directors of the Tetro Mining com-pany will meet in adjourned session te-morrow, when developments of interest are promised.

J. M. Hayes, who was recently added to the Utah Copper company's local organ-ization, came in from Bingham yesterday to remain permanently.

Lawrence Green, the mining man and broker, has returned from New York, where he has been upon business, and is again devoting himself to local interests, Two carloads of concentrates and one car of first-class ore from the Ohio Cop-per company's mines and mill at Bing-ham were delivered at the smelter yester-

per company's mines and mill at Bingham were delivered at the smelter yesterday.

The return of W. H. Alexander, who is serving the Majestic Mining company as its business manager, is scheduled for today. Mr. Alexander has been East for some time.

The Times of Miliford says Dr. Carpenter and associates, who recently took a bond on the Lenora, visited the property last week and decided to start work in the near future with a force of four men. Leasers at the Garnet have shipped a car of ore which is expected to sample 16 owness silver, 5 per cent lead, 5 per cent copper and 25 per cent from The Garnet is the property of George Whittaker of Mammoth and adjoins the Sunbeam, says a Tintic publication.

Capt. George Bridges, who has been identified with Tintic interests for many years, was among the visitors from that prosperous mining region during the day. The Captain is proparing for energetic work on his interests there the present year, and says the camps of Tintic as a whole never presented a more thrifty condition.
